## JIFFY POTS

Jiffy Pots are made from quality raw materials, consisting of a minimum 50% sphagnum peat, wood fibre and lime to adjust the pH. Jiffy pots eliminate the need for plastic pots and encourage quick, healthy growth, while stimulating root growth through improved aeration.

There are a number of benefits of using Jiffy Peat Pots. As the plants grow, the roots grow through the medium. This avoids internal spiralling and improves growth. When it comes to replanting, Jiffy Peat Pots eliminate transportation shock, as they do not need to be removed from the pot. Just drop the plant and Jiffy pot straight into its final planting position.
